

MARBLE RESTORER

MARBLE RESTORATION KIT

POLISHED MARBLE, POLISHED MARBLE
AGGLOMERATES

Marble restoration kit: removes acid stains and restores polish on small marble and travertine surfaces and on agglomerates.

Packaging

Boxes of 4.

WARNINGS

- Keep out of reach of children.
- Do not disperse into the environment after use.

TEMPERATURES

Storage temperature: from 5° to 30° C.

The product should be applied to materials with temperature between 5° and 30°C.

THE KIT CONTAINS

- Fila MarbleOne yellow metal pad.
- Fila MarbleTwo white resin-coated pad.
- Fila MarbleThree blue resin-coated pad.
- Fila MarbleSponge white polishing sponge.
- Fila MarbleShine, marble polish - 200 ml.
- Fila Formula Marmo, marble polish - 250 ml.
- Protective gloves.

WHAT IT'S FOR

- Restoring small marble, travertine or polished limestone surfaces, that have been attacked by acidic substances or weather conditions.
- Ideal for restoring bathroom or kitchen worktops, tables, steps, doorsteps, window sills.
- It also eliminates dullness due to wear and tear.
- **HIGH COVERAGE:** kit for restoring surfaces (1.5 m²) with up to 30 damaged areas measuring 6 to 7 cm in diameter.

MARBLERESTORER

Works on marble surfaces and on all polished limestones. On marble-concrete agglomerates (grit), marble-resin agglomerates with polished finish. Does not work on granite, quartz-resin agglomerates, natural stones that are resistant to acids.

Caution:

Some marble types, naturally resistant to acids, like "verde alpi" marble, cannot be polished with this treatment system.
